"Caring for you, wherever you are"

PRESS RELEASE – 10th December 2008

GLS Catering & Services awarded Cargill Ghana catering contract

Since 1999, we at GLS Catering Services have been active in the catering and services industry, committed to sharing our passion for services and good food.

We are proud to serve our clients whose business activities are based onshore or offshore, in the private sector or the public domain. Within the framework of our global operations, we can deploy our professional and multinational team to business sites, whether it be a bank or in a more demanding environment such as an oil rig, a construction site or a factory.

It gives us great pleasure to announce that GLS Catering Services Ltd has been awarded a new contract starting this week to provide an all-inclusive, 24-hour catering service to Cargill Ghana Limited in the Tema Free Zone.

With 160,000 employees in 67 countries, Cargill is an international provider of food, agricultural and risk management products and services. The company has recently started production at its new hi-tech cocoa processing plant in Tema, Ghana with the capacity to transform 65,000 tonnes of cocoa beans per annum into high quality cocoa liquor, butter and powders for customers globally. The plant provides full-time employment and training for some 200 employees.

Mr Laurent Guilard of GLS Corporation in the Ivory Coast has been especially deployed as Project Manager to oversee the catering operations at Cargill's new plant in Ghana.

The GLS team will be using its culinary and catering expertise to provide meals, snacks and beverages around the clock in the ultra-modern canteen to Cargill employees including factory workers, administrative personnel and senior management.

Our dedicated staff is proud to be taking care of Cargill's main asset – its workforce.
